DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 18-19 and 28, drawn to a proteinaceous molecule.
- II. Claims 13, 15-17, drawn to a method of identifying proteinaceous molecule with altered binding.
- III. Claim 14, drawn to a method of identifying with altered structure property.
- IV. Claim 20, drawn to a cell.
- V. Claim 21, drawn to a method of producing nucleic acid.
- VI. Claim 22, drawn to a method of peptide display.
- VII. Claims 23-27, drawn to a method of separating a substance from a mixture.
- VIII. Claim 29, drawn to a method of treating a pathological condition.
- IX. Claim 30, drawn to an assay.
- X. Claims 31-32, drawn to a gene delivery system.
- XI. Claims 33-34, drawn to a conjugate of protein molecule.
- XII. Claim 35, drawn to a chromatography column.

XIII. Claim 36, drawn to a nucleic acid.

XIV. Claims 37-39, drawn to a nucleic acid library.

The inventions are distinct, each from the other because of the following reasons:

Inventions II, III, V, VI, VII and VIII are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different methods comprising different process steps and/or components.

Inventions I, IV, IX, X, XI, XII, XIII and XIV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different compounds with different structures or functions.

Inventions (I, IV, IX, X, XI, XII, XIII and XIV) and (II, III, V, VI, VII and VIII) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP §

806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different methods and different compounds.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Group II-XIV, specifically the literature search, restriction for examination purposes as indicated is proper.

A telephone call was made to Allen Turner on 9/9/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
